### Report on “Sustainable Living with Technology”

#### Description of the event:

Department of Biotechnology 6y under IIPC Elite Talk - Bioface conducted a Virtual Invited Lecture on Sustainable Living with technology on May 05, 2021. The event began with a formal welcome beginning of presenting a welcome note by the students followed by the guest introduction. The audiences were UG and PG Students of Department of Biotechnology.

In the venture to achieve the requisite, the Dept. of Biotechnology conducted a Virtual Invited Lecture on An Insight into Cancer — A Riveting Disease on 31/05/2021 (Monday) through the way of Google Meet (<https://meet.google.com/uat-fklih-fbp>). The lecture was delivered by Mr. Naveen Ganesan, Serial Entrepreneur, Innovator, Technologist, Influencer. The program was inaugurated in the absence of the Principal, Dr. V. Rajendran Dr. N.G.P. Arts and Science College, Coimbatore. They motivated the students to take a precautionary measure for cancer.

The purpose of this virtual lecture is to create awareness among the students on Technology has been the driving force of civilization as we know. Earlier, technologies used to be small in scale, responsive to local skills and needs. These evolved slowly over a long period of time and catered to the local needs. Today, the technologies have grown in scale with high production rates, consuming large quantities of energy and resources, requiring large capital and highly-skilled manpower. The high production rate, consuming large quantities of natural resources has been damaging the ecosystem by indiscriminate extraction and the resulting environmental degradation. It is clear that present mode of production is unsustainable and damaging to the society. For example, ill effects of pesticides and fertilizers used in agriculture, have now become the concern of all. Hence, there is need to consider alternative ways of meeting our needs without damaging our ecosystems. Finally he motivated the student participants and concluded successfully with active participation of students from Department of Biotechnology. Valediction function was end of the event.

## Report on “Webinar on “Job roles and Skill requirement in Food Industry””

### Description of the event:

Our Department has organized a webinar on 'Job roles and skill requirement in food industry' by Prabhu Gandhi Kumar, Founder & CEO, TABP Snack and Beverages, Coimbatore, a Resource Person for Undergraduate and Post Graduate students of Food Science and Nutrition.

- The speaker explained about the importance of physio-chemical parameters to be assessed in beverages
- He taught about the importance of Food license, Cost and labeling technique

### Resource person Profile:

THE VISIONARY, SMART, FRUGAL ENTREPRENEUR  
PRABHU GANDHI KUMAR - FOUNDER & CEO, TABP SNACKS AND BEVERAGES

He "lives in the now (right)", then who better than Prabhu Gandhi Kumar can be an epitome of this. It takes courage, determination, commitment and a rock-solid plan, yet remaining humble (his secretary sums up Prabhu Gandhi Kumar, the smart frugal entrepreneur and founder of TABP Snacks and Beverages.

Prabhu's B.E in Mechanical Engineering from FMS College of Technology, Coimbatore, took him beyond the shores of India to Computer science since where he held various positions ranging from Program Manager to Portfolio Manager to Windows Deployment Manager to Senior Consultant in organizations like TCS and Consultancy Services and the same (Prabhu's) role in the USA helped him hone his skills in Capital allocation, Negotiations, Operations Management, Retail, Customer relationship management (CRM), team building and business development. Returning to India in 2012, Prabhu founded Tabasco, a franchise to produce metal coatings. However, Prabhu's interest in the legacy business of foodstuffs soon started dislodging. Food processing caught his attention and he got back to his roots (he was born in a farming family).

It wasn't as if there weren't enough fruit juice makers, bursting the market. Prabhu was quick to spot the gap – Rs. 10 MRP product for 200 ml. That was the magic figure. With a clear blueprint for what he wants to achieve, Prabhu gave wings to Tabasco Snacks and Beverages in 2015. After all the groundwork in 2015, the first batch of products rolled out in March 2016 and was an instant hit among the target segment – those at the bottom of the pyramid.

A well thought out distribution strategy has now made TABP stand out in many parts of South India. "The distributors who joined us in 2016 haven't left us. That is our big strength. We have also been able to give good quality products and maintain it. We keep getting repeat orders," says Prabhu Gandhi Kumar.

With the beverages and snacks business running like a well-oiled engine, Prabhu has now set his eye on the growing segment of nutrition-conscious and healthy eaters with a range of products. It is a matter of time before Prabhu's portfolio will have something for everybody.

### Report on “Technology as Driver of Change”

#### Description of the event:

Modern technology has paved the way for multi-functional devices like the smartwatch and the smartphone. Computers are increasingly faster, more portable, and higher-powered than ever before. With all of these revolutions, technology has also made our lives easier, faster, better, and more fun. Automated processes and other technology have become more important to the overall process of increasing output. While both workers and machines are interchangeable, workers are easier and less expensive to replace than machines, therefore worker's value has decreased as a result of technological change. Technology assists companies with managing changes to operations. Companies have successfully reduced costs by examining business processes and eliminating actions that customers do not perceive as valuable. A key challenge for both company leaders and technology staff, however, is shifting focus from projects centered on cost reductions to projects that develop innovative products and drive revenue. Both companies and consumers have benefited from technology-driven improvements such as online orders, ticketless travel and just-in-time inventory management.

#### Outcome of the Event:

- All the participants got some exposure on integrating human-machine hybrid teams.
- Students were able to know that Digital transformation drives upgrades, but may hurt technology first.
- Students understood how to use AI to help determine your culture's hiring DNA.

Dear Sir

Greetings from Dr. NGP Family!

It is indeed with great pleasure; we cordially invite you to participate in the **Industry Institute Partnership Conclave** scheduled on March 13, 2020 at 10:00 am in our College.

This proposed assembly stems from the strong conviction that industry and academic interaction would impart much needed employability skills to our students, and in turn meet ever-changing industry demand for well-trained workforce. Such a faithful symbiotic relationship requires a careful understanding, and calibration of capabilities and limitations in both sides of this partnership.

Recognizing the above, we identified following thrust areas for interaction:

- Student Training and Internship
- Experts Exchange
- Memorandum of Understanding (MoU)
- Curriculum Enrichment
- Entrepreneurship Awareness Programmes
- Continuing Education Programmes (training/ refresher courses)
- R&D, Consultancy and Products Development
- Resources Sharing
- Technological Database

We strongly believe that this **Industry-Institute Interaction** would accrue mutual benefits when a symbiotic relationship is developed between the two systems.
