2. Report of the Event

Maintaining personal hygiene and sanitation is important for several reasons such as personal, social, psychological, health, etc. Proper hygiene and sanitation prevent the spread of diseases and infections. If every individual on the planet maintains good hygiene for himself and the things around him, diseases will eradicate to a great level. Many of the common diseases mentioned earlier such as roundworms spread through the faeces of infected people. By ensuring that people do not defecate in the open, we can completely eliminate such diseases.

In this regard, NSS of Dr. N.G.P. Arts and Science College has conducted an exclusive event for the benefits of students as well as public people. 150 NSS volunteers (Unit I, II and III) took part in this event. The event is presided over by Prof. Dr. V. Rajendran, Principal of Dr. N.G.P. Arts and Science College. Dr. S. Namasivayam, Programme Officer of NSS Unit –I welcomed the gathering. Guruji Sivathma, Chief Guest of the event was introduced by Ms. S. Nithya, Programme Officer of NSS Unit – II.

Guruji Sivathma highlighted the significance of sanitation and cleanliness. He mentioned that contaminated water causes many water-borne infections like diarrhoea, and also serves as a carrier for vectors such as mosquitoes spreading epidemics. Open defecation means no sanitation. It fouls the environment, and spreads diseases. Clean drinking water and good sanitation would not prevent infections without practicing good hygiene. A simple habit of washing hands goes a long way towards preventing diseases. The stored water supply may also serve as a source of infection in the absence of hygiene. Mr. B. Narasimhan, Programme Officer of NSS Unit – III conveyed vote of thanks.
